2015 🍏🏆 Unqualified - No findings Read report	2014 🍏🏆 Unqualified - No findings Read report
----------------------------------------------------------------------------	----------------------------------------------------------------------------

📌 DID YOU KNOW?

There are 5 types of audit outcomes.

SOURCE: Municipal Audit Reports

<h4>Unqualified Opinion No Findings</h4> <p>The Auditor-General can state, without reservation, that the financial statements of the municipality fairly represent the financial position of the municipality and are in line with Generally Recognised Accounting Practices (GRAP).</p>	<h4>Unqualified Opinion Emphasis of Matter Items</h4> <p>Same as an Unqualified Opinion with no findings, but the Auditor-General wants to bring something particular to the attention of the reader.</p>	<h4>Qualified Opinion</h4> <p>The Auditor-General expresses reservations about the fair presentation of the financial statements. There is some departure from the Generally Recognised Accounting Practices (GRAP) but is not sufficiently serious as to warrant an adverse opinion or disclaimer of opinion.</p>	<h4>Adverse Opinion</h4> <p>This is expressed when the auditor concludes that the annual financial statements do not present the municipality's financial position, results of operations and cash flows in line with Generally Recognised Accounting Practices (GRAP).</p>	<h4>Disclaimer of Opinion</h4> <p>The Auditor-General does not have all of the underlying documentation needed to determine an opinion. For example, the lack of underlying documentation and the amounts in question may be so great so that it is impossible to give any opinion on all.</p>	<h4>An Outstanding Opinion</h4> <p>Means that the Auditor General raised queries with the municipality and therefore has not submitted another opinion.</p>

Cash Balance July 2016 - June 2017

Not available

What does this mean?

Cash balance at the end of the financial year.

About 1.3 times the cash balance for similar municipalities in KwaZulu-Natal: R 31 029 279

A little higher than similar municipalities nationally: R 39 911 370

📌 DID YOU KNOW?

A municipality's cash balance refers to the money it has in the bank that it can access easily. If a municipality's bank account is in overdraft it has a negative cash balance. Negative cash balances are a sign of serious financial management problems. A municipality should have enough cash on hand from month to month so that it can pay salaries, suppliers and so on.

REFERENCE: State of Local Government Finances

FORMULA: Cash available at year end
= Cash Flow item code 4200, Audited Actual

Cash Coverage July 2016 - June 2017

Not available

What does this mean?

Months of operating expenses can be paid for with the cash available.

More than double the coverage for similar municipalities in KwaZulu-Natal: 3.6 months

More than double the coverage for similar municipalities nationally: 2.8 months

📌 DID YOU KNOW?

Cash coverage measures the length of time, in months, that a municipality could manage to pay for its day-to-day expenses using just its cash reserves. So, if a municipality had to rely on its cash reserves to pay all short-term bills, how long could it last? Ideally, a municipality should have at least three months' of cash cover.

- good 🍏 More than 3 months
- average 🍌 Between 1 and 3 months
- bad 🍏 Less than 1 month

REFERENCE: State of Local Government Finances

FORMULA: = Cash available at year end / Operating Expenditure per month
= Cash Flow item code 4200, Audited Actual / (Income & Expenditure item code 4600, Annual Audited Actual / 12)
If Cash available at year end is negative, we say Cash Coverage is zero months.

Spending of Operating Budget July 2016 - June 2017

Not available

What does this mean?

Difference between budgeted operating expenditure and

what was actually spent.

More than double the underspending or overspending for similar municipalities in KwaZulu-Natal: -1.4%

More than double the underspending or overspending for similar municipalities nationally: 0.2%

- 👍 **good** Up to 5%
- 👎 **average** Between 5% and 15%
- 👎 **bad** More than 15%

📌 DID YOU KNOW?

This indicator is about how much more a municipality spent on its operating expenses, than was planned and budgeted for. It is important that a municipality controls its day-to-day expenses in order to avoid cash shortages. If a municipality significantly overspends its operating budget this is a sign of poor operating controls or something more sinister.

Overspending by up to 5 percent is usually condoned; overspending in excess of 15 percent is a sign of high risk.

REFERENCE: [Over and under spending reports to parliament](#)

FORMULA: = (Actual Operating Expenditure - Budget Operating Expenditure) / Budgeted Operating Expenditure
 = (Income & Expenditure item code 4600, Audited Actual) - Income & Expenditure item code 4600, Adjusted Budget) / Income & Expenditure item code 4600, Adjusted Budget

Spending of Capital Budget July 2016 - June 2017

Not available

What does this mean?

Difference between budgeted capital expenditure and what was actually spent.

About two-thirds of the underspending or overspending for similar municipalities in KwaZulu-Natal: -15.9%

About half of the underspending or overspending for similar municipalities nationally: -20.76%

- 👍 **good** Up to 5%
- 👎 **average** Between 5% and 15%
- 👎 **bad** More than 15%

📌 DID YOU KNOW?

Capital spending includes spending on infrastructure projects like new water pipes or building a library. Underspending on a capital budget can lead to an under-delivery of basic services. This indicator looks at the percentage by which actual spending falls short of the budget for capital expenses. Persistent underspending may be due to under-resourced municipalities which cannot manage large projects on time.

Municipalities should aim to spend at least 95 percent of their capital budgets. Failure to spend even 85 percent is a clear warning sign.

REFERENCE: [Over and under spending reports to parliament](#)

FORMULA: = (Actual Capital Expenditure - Budgeted Capital Expenditure) / Budgeted Capital Expenditure
 = (Capital item code 4100, Total Assets, Audited Actual) - Capital item code 4100, Total Assets, Adjusted Budget) / Capital item code 4100, Total Assets, Adjusted Budget

Spending on Repairs and Maintenance July 2016 - June 2017

Not available

What does this mean?

Spending on Repairs and Maintenance as a percentage of Property, Plant and Equipment.

The same as the spending for similar municipalities in KwaZulu-Natal: 0.0%

Less than 10 percent of the spending for similar municipalities nationally: 0.9%

- 👍 **good** More than 8%
- 👎 **bad** Less than 8%

📌 DID YOU KNOW?

Infrastructure must be maintained so that service delivery is not affected. This indicator looks at how much money was budgeted for repairs and maintenance, as a percentage of total fixed assets (property, plant and equipment). For every R10 spent on building/replacing infrastructure, R0.80 should be spent every year on repairs and maintenance.

This translates into a Repairs and Maintenance budget that should be 8 percent of the value of property, plant and equipment.

REFERENCE: [Circular 71](#)

FORMULA: = Repairs and maintenance expenditure / (Property, Plant and Equipment + Investment Property)
 = Capital Acquisition item code 4100, Audited Actual) / (Balance Sheet item code 1300, Audited Actual + Balance Sheet item code 1401, Audited Actual)

Fruitless and Wasteful Expenditure July 2014 - June 2015

0.14% 😞

Unauthorised, Irregular, Fruitless and Wasteful Expenditure as a percentage of operating expenditure.

Less than 10 percent of the expenditure for similar municipalities in KwaZulu-Natal: 6.35%

Less than 10 percent of the expenditure for similar municipalities nationally: 10.754999999999999%

- 👍 **good** 0%
- 👎 **bad** More than 0%

📌 DID YOU KNOW?

Unauthorised expenditure means any spending that was not budgeted for or that is unrelated to the municipal department's function. An example is using municipal funds to pay for unbudgeted projects. **Irregular** expenditure is spending that goes against the relevant legislation, municipal policies or by-laws. An example is awarding a contract that did not go through tender procedures. **Fruitless and wasteful** expenditure concerns spending which was made in vain and would have been avoided had reasonable care been exercised. An example of such expenditure would include paying a deposit for a venue and not using it and losing the deposit.

REFERENCE: [Circular 71](#)

FORMULA: = Unauthorised, Irregular, Fruitless and Wasteful Expenditure / Actual Operating Expenditure
 = Unauthorised, Irregular, Fruitless and Wasteful Expenditure item codes irregular, fruitless, unauthorised / Income & Expenditure item code 4600, Audited Actual

NOTE: Since calling expenditures unauthorised, fruitless and wasteful or irregular can involve quite a lot of debate, the numbers used are the restated audited amounts 18 months after the financial year end - part of the Medium Term Revenue and Expenditure Framework.

Current Ratio July 2015 - June 2016 Quarter 4

20.26 😊

The value of a municipality's short-term assets as a multiple of its short-term liabilities.

More than double the ratio for similar municipalities in KwaZulu-Natal: 3.7

More than double the ratio for similar municipalities nationally: 4.635

good 😊 More than 1.5
average 😐 Between 1 and 1.5
bad 😞 Less than 1

📌 DID YOU KNOW?

The current ratio compares the value of a municipality's short-term assets (cash, bank deposits, etc) compared with its short-term liabilities (creditors, loans due and so on). The higher the ratio, the better. The normal range of the current ratio is 1.5 to 2 (the municipality has assets more than 1.5 to 2 times its current debts). Anything less than that and the municipality may struggle to keep up with its payments.

REFERENCE: Circular 71

FORMULA: = Current Assets / Current Liabilities
 = Balance Sheet item code 2150, Monthly Actual / Balance Sheet item code 1600, Monthly Actual

NOTE: The quarterly summary looks at the state at the end of each quarter. If the monthly data is missing for the last month in the quarter, the previous month in that quarter. If all months are missing, that quarter is shown as blank.

Liquidity Ratio July 2015 - June 2016 Quarter 4

17.49 😊

The municipality's immediate ability to pay its current liabilities

More than double the ratio for similar municipalities in KwaZulu-Natal: 2.15

More than double the ratio for similar municipalities nationally: 2.6100000000000003

good 😊 More than 1
bad 😞 Less than 1

📌 DID YOU KNOW?

Liquidity ratios show the ability of a municipality to pay its current liabilities (monies it owes immediately such as rent and salaries) as they become due, and their long-term liabilities (such as loans) as they become current.

These ratios also show the level of cash the municipality has and / or the ability it has to turn other assets into cash to pay off liabilities and other current obligations.

REFERENCE: Municipal Budget and Reporting Regulations

FORMULA: = (Cash + Call Investment Deposits) / Current Liabilities
 = Balance Sheet item codes 1800, 2200, Monthly Actual / Balance Sheet item code 1600, Monthly Actual

NOTE: The quarterly summary looks at the state at the end of each quarter. If the monthly data is missing for the last month in the quarter, the previous month in that quarter. If all months are missing, that quarter is shown as blank.

Current Debtors Collection Rate July 2015 - June 2016 Quarter 4

40.99% 😞

The percentage of new revenue (generated within the financial year) that a municipality actually collects

More than 1.5 times the rate for similar municipalities in KwaZulu-Natal: 24.375%

More than 1.5 times the rate for similar municipalities nationally: 24.375%

good 😊 95% or more
bad 😞 Less than 95%

📌 DID YOU KNOW?

Municipalities don't manage to collect all of the money they earn through rates and service charges. This measure looks at the percentage of new revenue that a municipality collects. It is also referred to as the Current Debtors Collection Ratio.

REFERENCE: Municipal Budget and Reporting Regulations

FORMULA: = Collected Revenue / Billed Revenue
 = Cash Flow item codes 3010, 3020, 3030, 3040, 3050, 3060, 3070, 3100, Monthly Actual / Income and Expenditure item code 0200, 0300, 0400, 1000, Monthly Actual

NOTE: The quarterly summary looks at the state at the end of each quarter. If the monthly data is missing for the last month in the quarter, the previous month in that quarter. If all months are missing, that quarter is shown as blank.

📌 INCOME

Where does Ezingoleni get its money from?

1. Money Generated Locally

July 2016 - June 2017

Not Available

From residents paying for **water & electricity, rates, licenses & fines**, and from interest and investments.

+

2. Money from National Government

July 2016 - June 2017

Not Available

From the **Equitable Share** of taxes, and **Grants from National Government**.

📌 DID YOU KNOW?

The more a municipality is able to generate its own income, the more self-sufficient it is. Municipalities should not be too reliant on transfers and grants from other spheres of government.

REFERENCE: Local Government Equitable Share

SOURCE: Income & Expenditure Audited Actual

Where money comes from

DID YOU KNOW?

This shows how much of a municipality's income it is able to generate itself (through property rates, service charges, etc), compared with how much it receives as transfers and grants from national government. The more a municipality is able to generate its own income, the more self-sufficient it is.

SPENDING - How money is spent

Staff Wages and Salaries July 2016 - June 2017

Not available

What does this mean?

Staff salaries and wages as a percentage of operating expenditure.

within norms 25% to 40%
outside norms less than 25% or more than 40%

DID YOU KNOW?

Employee-related costs are typically the largest portion of operating expenditure, but they should not grow so large that they threaten the sustainability of the operating budget.

The normal range for this indicator is between 25% - 40% of total operating expenditure. Municipalities must guard against spending too much on staff while also making sure they have the people they need to deliver services effectively.

FORMULA: = Wages & Salaries + Social Contributions / Actual Operating Expenditure
 = [Income & Expenditure item codes 3000, 3100, Audited Actual](#) / [Income & Expenditure item code 4600, Audited Actual](#)

Contractor Services July 2016 - June 2017

Not available

What does this mean?

Costs of contractor services as a percentage of operating expenditure.

within norms up to 5%
outside norms more than 5%

DID YOU KNOW?

Private contractors are sometimes needed for certain work, but they are usually more expensive than municipal staff. This should be kept to a minimum and efforts should be made to provide services in-house, where possible.

This measure is normally between 2 percent and 5 percent of total operating expenditure.

FORMULA: = Contracted Services / Actual Operating Expenditure
 = [Income & Expenditure item code 4200, Audited Actual](#) / [Income & Expenditure item code 4600, Audited Actual](#)

What is Money Spent On?

DID YOU KNOW?

Municipalities spend money on providing services and maintaining facilities for their residents.
